

# 2023 Global Mycotoxin Report

by Marisabel Caballero and Vinil Samraj Padmini, EW Nutrition GmbH

2023 was yet another challenging year for raw materials. Not only is volatility continuing to impact prices and supply security, but 92% of the 7000+ analyses conducted by EW Nutrition were found above detection limits for at least one of the mycotoxins tested.

See how various regions performed in our report.

## Global mycotoxin challenges 2023
