

Harvest to bring significant quality challenges for feed, says EW Nutrition [Press Release]

VISBEK, GERMANY, 23 August - Bad news for feed producers: after supply chain disruptions and raw material unavailability, now weather-related challenges in Europe will most likely affect this year's crop quantity and quality. Cold temperatures, heatwaves, tornados, and hailstorms are expected to adversely affect the quality and quantity of the harvest.

The moisture brought by the rainfalls is generally expected to affect the quality of the crops. The torrential rains in France, Germany, etc. have darkened Central and Western farmers' prospects: while the quantity may be there, the quality of wheat and corn is under question. Sprouting grains, diseased crops, and fungi may dampen the optimism brought by numbers alone.

Further east, droughts have posed different issues. Still, countries such as Romania and Bulgaria seem to have weathered the challenges somewhat better and are seeing YoY increases in their wheat and corn crop output.

In Great Britain, rainfall has not caused dramatic drops in crop output but has nevertheless greatly increased mycotoxin risk up to a "moderate to high" level.

Depending on the type of mycotoxin, weather challenges and storage conditions are the most common contributors to severe infestation. This year's intemperate weather has, in fact, been ideal for a large spectrum of fungi. Fungal risks can be calculated at the two critical times: at flowering and at harvest and baling, when there is an increased risk of storage molds and mycotoxin production.

Preliminary analysis shows Europe's wheat crops at potential risk of DON, as well as potentially Aflatoxin

and Fumonisin infestation and more. Specialists continue to collect and monitor harvest results and adjust recommendations; however, we can definitely expect the presence of moderate, if not quite high levels of mycotoxin risk this year.

Digital EuroTier 2021: Get to know EW Nutrition like never before

Visitors to EW Nutrition's innovative online booth at this year's EuroTier (9-12 February) will get exclusive access to our program and product presentations, delivered by our technical experts. Look forward to exploring our newly acquired Feed Quality and Pigment offers, as well as a live stream session on passive immunity in dairy calves.

The EW Nutrition team will share our expertise on how to support gut health, mitigate the impact of mycotoxins and [bacterial toxins](#), and reduce the incidence of diarrhea in young animals. We will also introduce visitors to our recently-acquired [new product ranges](#), including the [SANTOQUIN®](#) feed preservative range, the feed mill processing aid [SURF●ACE®](#), and the [feed ingredient Agrado® Plus](#). Our technical experts will be available for audio and video meetings, which can be scheduled via the [EuroTier 2021 online platform](#).

Not to be missed is EW Nutrition's "spotlight" event on cattle, presented by our technical manager for Farm Solutions, Lea Poppe. Lea will explore the topic of "Passive Immunity in Dairy Calves: Recent Insights and Innovative Solutions" during a public event for all EuroTier visitors. Join us at 9 am, CET, on February

10, for an in-depth presentation and lively discussion.

As the [2021 EuroTier](#) will take place fully online, visitors to the world's leading trade fair for animal production will be able to enjoy attractive digital networking opportunities. We look forward to meeting you there!

About EW Nutrition

EW Nutrition is a global animal nutrition company that offers integrators, feed producers, and self-mixing farmers comprehensive, customer-focused solutions for feed quality, gut health management, antibiotic reduction, young animal nutrition and more.

EW Nutrition launches new xylanase enzyme in Malaysia

Singapore - December 28, 2020 - In its continued efforts to reduce antibiotic use in the region while also improving farm profitability, EW Nutrition launched Axxess® XY in Malaysia on December 17, 2020.

Axxess® XY is a next-generation intrinsically thermostable xylanase, with unparalleled stability under high temperatures and especially longer conditioning time. With its ability to break down both the soluble and insoluble fiber fraction from feed ingredients, the enzyme offers high flexibility in feed formulation. The newly launched product thus gives feed producers peace of mind when working with various feed processing conditions, as well as significant feed cost savings.

The launch took place in the context of a customer online event titled “Revolutions in Poultry Nutrition: The Future of Enzymes” for customers in Malaysia. During the information-laden event, Dr. Howard Simmins, an accomplished global communicator and independent key opinion leader, highlighted the need for improved functionality from xylanases. With his vast experience on feed additive development for animal nutrition and health, including cutting edge biotech research into enzymes, probiotics, prebiotics and novel additives, Dr. Simmins also discussed ways to formulate feed accurately to optimize xylanase value, and optimize nutrition with enzyme products.

During the event, other presentations were delivered by Daniel Tepe, Managing Director, Dr. Andreas Michels, Head of Biotechnology, and Dr. Ajay Awati, Global Category Manager Gut Health and Nutrition, EW Nutrition. The webinar was hosted by Jurek Grapentin, Regional Director, EW Nutrition South East Asia/Pacific.

The webinar was rounded off with an interactive Question and Answer session, where the audience had the opportunity to have their questions answered live by the panel of speakers.

“This revolutionary enzyme is a testament of our dedication to provide a holistic suite of animal nutrition solutions to our valued customers in this region. [Axxess® XY](#) will provide a competitive edge with regard to feed formulation, which translates to cost savings to our customer. With the expertise of our R&D researchers, we are constantly striving to bring more innovative solutions to meet the challenging needs of this industry,” said **Jurek Grapentin**.

New distribution partnership with Russian key player in poultry feed additives

Moscow - September 18, 2019 - VITOMEK and EW Nutrition are pleased to announce that they have signed a distribution partnership agreement, combining the accumulated knowledge, experience, and effective solutions in the field of animal nutrition at VitOmeK with a portfolio of comprehensive programs, innovative products, and services from EW Nutrition.

Dmitry Chudakov, General Director, VitOmeK: “The partnership agreement with EW Nutrition has become an important event for us and another milestone on the road to success. We are pleased that our new partner is a company with many years of experience in the animal nutrition industry. We are confident that our scientific and technical potential, in conjunction with the valuable experience of the partner, will bring rich benefits in the form of joint development, creation of unique products and services, and the

implementation of even more ambitious projects. Our philosophy: “Focus on high results. Give shape to courageous ideas in the final product. ”

VitOmek is one of the largest Russian producers of agricultural feed and feed additives, offering comprehensive, effective solutions for agricultural holdings and small enterprises in the poultry and livestock sector. The company’s range of services includes technological, veterinary and engineering support of farms, audit and consulting on microclimate and animal welfare.

Pavel Vladimirovich Bogatkin, General Director, EW Nutrition Russia: “We are very pleased to cooperate with VitOmek. Years of experience in the market, as well as great resources and coverage, making them an excellent ally in our common efforts. In addition to a similar market development philosophy, we see for ourselves a similar mission: mitigating the effects of antimicrobial resistance by providing comprehensive solutions in the field of animal feeding, toxin risk management, and young animal nutrition. Achieving these goals ultimately helps to [increase the effectiveness of human healthcare](#). ”

EW Nutrition researches, develops, manufactures, markets, and services its products and programs around the world. Headquartered in Germany, EW Nutrition’s manufacturing facilities are located on 4 continents. Innovation is carried out by our own research laboratories in Germany, with development centers in 5 major animal nutrition markets. EW Nutrition is active worldwide, with its own staff in 27 countries. Our slogan, “Functional Innovations Backed by Science,” is being implemented through technical support at the local, regional, and global level.

EW Nutrition Opens New Production Plant in China

Press Release

EW Nutrition Opens New Production Plant in China

On 29 October, German-based company EW Nutrition will officially open its new production plant in China. The new plant is the next step in the successful development of EWN Biotechnology Shanghai.

By offering holistic, science-backed solutions, EW Nutrition supports the Chinese industry in its effort to reduce antibiotic use. "With this latest investment," says Craig Allen, General Manager, EWN Biotechnology Shanghai, "we are offering a twofold benefit to our Chinese customers: bringing our high-value products closer to the end-user, while implementing our policy of [supporting antibiotic-free production in China.](#)"

The new facility in Haimen will produce the three leading product lines in the company's portfolio. They represent EW Nutrition's answer to gut and [respiratory health issues](#), as well as toxin risk management. "We are pleased to bring our programs closer to our customers, further increasing service levels," says Michael Gerrits, Managing Director, EW Nutrition. "But we are even more pleased and honored to bring here our mission of mitigating the impact of antimicrobial resistance by providing comprehensive animal nutrition solutions."

The virtual opening will take place at the Melia Hotel in Shanghai, to be followed by a one and a half-day symposium on "Reducing Antibiotic Use and Mitigating the AMR Risk - 2020 Vision". Speakers include Prof. Chen Junshi, Prof. Jia Yanxiong, Prof. Suwit Chotinun, as well as other prestigious national and international guests.

About EW Nutrition

EWN Biotechnology Ltd. is the Chinese arm of EW Nutrition, an international animal nutrition company that offers integrators, feed producers, and self-mixing farmers comprehensive animal nutrition solutions for antibiotic reduction, young animal nutrition, toxin risk management and more.

EW Nutrition USA - Increased profitability in poultry production

[Increased profitability in poultry production: EW Nutrition presents new comprehensive programs for the American market at Midwest Poultry Federation \(MPF\)](#)

To support customers with effective solutions in animal production, EW Nutrition introduces the programs for [Antibiotic Reduction](#) and [Toxin Risk Management](#) in poultry. These programs contribute to solving the problem of antibiotic resistance by minimizing the input of antibiotics. In addition to innovative products the programs include customized consultancy services in the fields of animal nutrition, management and biosecurity.

At MPF, EW Nutrition will present new programs to reduce antibiotic use in broiler, broiler breeder and turkeys. A program to manage the toxin risk in poultry will also be introduced. One part of the programs is innovative products supporting gut and liver health and mitigating the impact of myco- and bacterial toxins. The other part is formed by consultancy services tailored to the particular needs of the customers.

The goals of the poultry programs are:

- stabilization of performance throughout the whole cycle
- constant high numbers of high quality chicks
- a reduced variety between flocks

- improved weight gain and feed conversion.

MARK RICHARDS, President of EW Nutrition USA

“Keeping performance high by simultaneously reducing the use of antibiotics is a balance act in animal production. We are convinced that the reduction of antibiotic use is the best way to reduce antibiotic resistance. With our comprehensive programs we support integrators, farmers and animals in coping with challenges occurring in animal production while increasing customers’ profitability.”

EW Nutrition:

The customer-oriented company focusses on solving critical issues in animal nutrition by offering holistic and tailored programs for antibiotic reduction, toxin risk management and young animal nutrition. For this purpose EW Nutrition introduced innovative products and services resulting from solid R&D and business development. A global network of local commercial and technical support by experts guarantees the closeness to the customer. The reliable family-owned company is situated in Germany and has own R&D, production and application facilities in different parts of the world.
