

EW Nutrition welcomes two additions in key global roles

VISBEK, JANUARY 2025 - EW Nutrition confirms two names were added to key positions in its global team. From January 2025, Marie Gallissot and Nadia Yacoubi have joined the German-headquartered animal nutrition company.

Marie Gallissot joins as Category Manager Feed Quality Solutions, with a rich background and over 15 years' experience in toxin solutions and feed management. She is going to oversee a portfolio comprising toxin binders, antioxidants, acidifiers and more, working in close collaboration with regional affiliates as well as connected platforms in EW Nutrition.

Nadia Yacoubi joins as Phytogenic Products Manager inside EW Nutrition's Gut Health platform. With a doctoral degree in Veterinary Sciences, held jointly from Ghent and Nantes universities, she brings 10+ years of technical expertise in the field of gut health, as well as animal husbandry and food safety.

"We've had a quick and comprehensive onboarding in Germany," says Nadia Yacoubi, "and we're both already joining meetings in EW Nutrition's regional and global teams, which is a great way to hit the ground running." With this hands-on approach, adds Marie Gallissot, "it's easy to get acquainted with the people, the passion, and the energy driving EW Nutrition forward."

Jan Vanbrabant, EW Nutrition's CEO, welcomed them during the onboarding week, saying "We want to make sure we show them the full picture: who we are, where we are and where we want to be. And we are happy that they are such a great fit to our corporate culture, bringing expertise, integrity, team spirit, and an element of fun and passion."

EW Nutrition is a global player in the animal health and nutrition industry, delivering solutions for gut health, feed quality, digestibility, and more. It is headquartered in Northern Germany and focuses on promoting sustainable growth through reduced FCR, natural support against challenges, reduced need for antibiotics, and planet-friendly protein production.

EW Nutrition appoints two new Regional Directors

VISBEK, 6 January 2025 - EW Nutrition, a leading player in the global animal health and nutrition industry, has appointed two top industry professionals to lead the SEAP and China teams, respectively. After another year of geographical and commercial expansion, EW Nutrition has recently announced that Gert-Jan Gerrits and Hai Xia Zhu will lead two of its most important growth regions.

Starting with January 1st, Hai Xia Zhu will lead EW Nutrition's China team. With a background of more than 15 years in leadership roles in animal protein production, she takes over a growing business in a highly promising market. "EW Nutrition's team in China has already demonstrated excellence in providing customer-centric solutions. I'm happy to lead the team into the next chapter of our growth."

Also from January 1st, Gert-Jan Gerrits takes over the South East Asia and Pacific unit, bringing more than 20 years of experience leading teams in the animal farming, health, and nutrition industry. He will be located in Singapore. "I'm extremely pleased with the welcome I have received in EW Nutrition, and quite impressed with the range of powerful solutions and capabilities it brings to the SEAP market. I look forward to working with a team of high achievers," says Gert-Jan Gerrits.

Jan Vanbrabant, EW Nutrition's CEO, has already welcomed the two newcomers for an intense first week of onboarding at the German headquarters. "We provide top-tier solutions for animal gut health, toxin risk management, growth performance etc, and we now have a full team of top-tier executives leading EW Nutrition's commercial expansion into a new era of growth. We welcome Gert-Jan and Hai Xia with open arms and wish them every success."

At a time when other companies seem to divest or restructure, these are the latest appointments in a chain of remarkable top hires to EW Nutrition's global team, reflecting the company's commitment to solid

growth around the world.

EW Nutrition acquires BIOSTABIL product line from dsm-firmenich

VISBEK, 5 March 2024 - EW Nutrition, a global provider of animal nutrition solutions, announced today that it has acquired the BIOMIN BIOSTABIL product line from dsm-firmenich. The deal gives EW Nutrition ownership over an established and successful line of silage inoculants.

"The agreement we have concluded gives us a solid foothold in a sector where we are currently developing a more substantial presence" says Jan Vanbrabant, CEO of EW Nutrition. "EW Nutrition continues to expand strategically, enriching its portfolio with market-leading solutions, developed in-house or through acquisitions. The BiomIn Biostabil line joins an innovative portfolio that has been growing tremendously in the last three years with the launch of Ventar D and Pretect D, our Feed Quality and Pigment lines acquired in 2021, and yet another momentous global launch coming up shortly." This solid, well-proven line of silage inoculants, says Vanbrabant, will be an important addition to customers of EW Nutrition's On-Farm Solutions business around the world.

The transaction was closed on March 1, 2024. Under the services agreement concluded, all customers will be actively supported over the next months, while the asset, brand, and go-to-market will be transitioned to EW Nutrition in the coming period.

The financial details of the sale remain confidential.

Gustavo Tesolin appointed Regional Director of EW Nutrition LATAM

29 January 2024, Visbek - German-based company EW Nutrition, a global provider of functional animal nutrition solutions, has appointed Gustavo Carlos Tesolin as its Regional Director for Latin America.

An agricultural engineer by training, Gustavo Tesolin has forged an international career in the Animal Health business during the last 25 years. With different leadership roles in several major international organizations such as Novartis, Elanco, and Erber Group, Mr. Tesolin brings along important experience in Commercial Operations, P&L drive, and Strategy execution, with special emphasis on team development and geographic expansion.

"I am really excited to join a company as innovation-driven and science-focused as EW Nutrition," Tesolin said. "The recent launch of VENTAR D, a novel phytogenic specifically designed and developed to improve animal husbandry results, will continue to strengthen our position in the region, together with our winning brands PRETECT D and ACTIVO" and added, "I am eager to take on the challenge and better acquaint the market with an excellent portfolio centered on Gut Health Management, Digestibility, and Feed Quality."

Jan Vanbrabant, CEO of EW Nutrition, noted that Gustavo Tesolin is "the perfect combination of the right experience and the right attitude. We are happy to have found in him a proven leader with not just

excellent market knowledge, but with the same values we share in EW Nutrition: a passion for innovation in the service of our customers, and relentless curiosity and energy to find the right solution.”

This appointment comes on the heels of several top-tier global hires over the last 18 months and reflects the company’s commitment to the Latin American market.

Tesolin will move to Mexico to coordinate EW Nutrition’s expansion in Latin American countries.

EW Nutrition welcomes Jan Vanbrabant as new CEO

VISBEK (Germany), 1 September 2023 — EW Nutrition, a leading global provider of functional animal nutrition solutions, welcomes Jan Vanbrabant as its new Chief Executive Officer.

Jan has a PhD degree in microbiology and is an experienced manager in animal health and nutrition, having held leadership roles at DSM, Erber Group, Biomin and Kemin.

“We are very pleased that we have found a strong management lead in Jan, who embodies the philosophy of EW Nutrition”, says Jan Wesjohann, Managing Director of parent company EW Group. “EW Nutrition is an innovation-driven company, with intensive investment in R&D. Together with Jan we are looking to enter the next growth phase of EW Nutrition.”

“I am very excited to be joining the EW Nutrition team,” said Jan Vanbrabant. “EW Nutrition’s long-term focus has created an extremely competitive portfolio. EW Nutrition is uniquely positioned to support its

customers in mastering the challenges of the changing animal health and nutrition environment.”

Former CEO Michael Gerrits is heading into retirement after six years leading EW Nutrition. “I want to thank Michael Gerrits for his essential stewardship in bringing the company to the next level,” said Jan Wesjohann.

About EW Nutrition

EW Nutrition is a global animal nutrition company that offers integrators, feed companies, and veterinarians comprehensive solutions for animal gut health and performance, feed quality, digestibility, and more. It is focused on promoting sustainable growth through reduced FCR, natural support against challenges, reduced need for antibiotics, and planet-friendly protein production.

EW Nutrition showcases innovative solutions at International Dairy Week 2022

Singapore - January 14, 2022 – EW Nutrition will participate in Australia’s International Dairy Week (IDW) in Tatura, Victoria, from January 16 to 20, 2022. Visitors will learn about innovative solutions for ruminant nutrition. Located at Site 37, EW Nutrition also invites attendees to explore topics such as toxin risk management and [respiratory issues](#).

“We are excited to be here at IDW 2022. This is a great opportunity for us to showcase our cutting-edge dairy solutions. We look forward to connecting and working with our valued customers to enhance ruminant health and performance,” said **David Sherwood**, commercial director for Oceania at EW Nutrition.

Within the portfolio, the showcased products are Pasturefed Cattle Assurance System (PCAS) certified:

Activo Premium

[Activo Premium](#) contains standardized amounts of selected phytomolecules.

Mastersorb Gold

[Mastersorb Gold](#) is part of EW Nutrition's [Toxin Risk Management](#) Program, which also includes services, on-site advice, and expert consultancy.

Prote-N

[Prote-N](#) is a slow-release source of nonprotein nitrogen (NPN).

About EW Nutrition

EW Nutrition offers animal nutrition solutions to the feed industry. The company's focus is on gut health, supported by other product lines. EW Nutrition researches, develops, produces, sells and services most of the products it commercializes. In 50 countries, key accounts are served directly by EW Nutrition's own personnel.

EW Nutrition achieves PCAS Certification in Australia

Singapore – November 1, 2021 – EW Nutrition has successfully passed an external audit conducted by the Cattle Council of Australia (CCA) and achieved Pasturefed Cattle Assurance System (PCAS) certification for three products: Activo Premium, [Mastersorb Gold](#), and Prote-N.

The PCAS is a certification program that enables grassfed cattle producers to prove claims relating to pasturefed or grassfed production methods. EW Nutrition also achieved two optional modules under the PCAS Standards relating to the freedom from antibiotics and hormone growth promotants (HGP). As a certified supplier, EW Nutrition is able to provide feed products to the industry to support pasturefed or grassfed production methods.

“We are pleased to receive the certification for our solution offerings in Australia. The qualification of these products is a testament of our commitment to work together with the industry to mitigate the impact of antimicrobial resistance. By pursuing our objectives in animal nutrition, our work contributes to increasing the efficacy of human healthcare.” said **David Sherwood**, Commercial Director Oceania with EW Nutrition.

The PCAS certified products are:

Activo Premium

Activo Premium contains standardized amounts of selected phytomolecules.

Mastersorb Gold

Mastersorb Gold is part of EW Nutrition’s [Toxin Risk Management](#) Program, which also includes services, on-site advice, and expert consultancy.

Prote-N

Prote-N is a slow-release source of nonprotein nitrogen (NPN).

EW Nutrition launches Pretect D to support poultry gut health during challenging periods

VISBEK, 28 September - EW Nutrition announces the launch of a novel gut health solution for poultry. Prepect D, a proprietary blend of phytomolecules, helps maintain bird performance and farm profitability.

Trials indicate that [Prepect D](#) offers natural support even during *Eimeria*-related challenges, making it an effective addition to programs focused on gut health issues.

“EW Nutrition is a front runner when it comes to innovations driving lower use of antibiotics and harmful chemicals in the animal production industry,” says Michael Gerrits, Managing Director. “The introduction of Prepect D signifies our commitment to helping customers make livestock production more sustainable through best-in-class natural solutions.”

Research with Prepect D conducted around the globe, in research institutes and under commercial conditions, evidenced improved body weight and lower feed conversion rate. EW Nutrition is also following up on initial results indicating significant oocyst count reduction.

“Poultry producers are affected by reduced animal performance and high costs for preventive and therapeutic control,” says Madalina Diaconu, Product Manager for Prepect D. “What our product brings to the market is an ability to support the natural defenses of birds. We’re also investigating our product’s ability to impair the growth cycle of the *Eimeria* population.” Prepect D is developed to be used in combination with vaccines, ionophores and chemicals, as part of the shuttle or rotation program.

About EW Nutrition

For the global animal production and feed industries, EW Nutrition offers innovative, comprehensive solutions for gut health, feed quality, pigmentation, digestibility, on-farm performance and more.

Headquartered in Germany, with R&D and manufacturing facilities around the world, EW Nutrition owns the entire value chain, from development and scale-up to production, distribution, and support in 90+ markets.

Harvest to bring significant quality challenges for feed, says EW Nutrition [Press Release]

VISBEK, GERMANY, 23 August - Bad news for feed producers: after supply chain disruptions and raw material unavailability, now weather-related challenges in Europe will most likely affect this year's crop quantity and quality. Cold temperatures, heatwaves, tornados, and hailstorms are expected to adversely affect the quality and quantity of the harvest.

The moisture brought by the rainfalls is generally expected to affect the quality of the crops. The torrential rains in France, Germany, etc. have darkened Central and Western farmers' prospects: while the quantity may be there, the quality of wheat and corn is under question. Sprouting grains, diseased crops, and fungi may dampen the optimism brought by numbers alone.

Further east, droughts have posed different issues. Still, countries such as Romania and Bulgaria seem to have weathered the challenges somewhat better and are seeing YoY increases in their wheat and corn crop output.

In Great Britain, rainfall has not caused dramatic drops in crop output but has nevertheless greatly increased mycotoxin risk up to a "moderate to high" level.

Depending on the type of mycotoxin, weather challenges and storage conditions are the most common contributors to severe infestation. This year's intemperate weather has, in fact, been ideal for a large spectrum of fungi. Fungal risks can be calculated at the two critical times: at flowering and at harvest and baling, when there is an increased risk of storage molds and mycotoxin production.

Preliminary analysis shows Europe's wheat crops at potential risk of DON, as well as potentially Aflatoxin and Fumonisin infestation and more. Specialists continue to collect and monitor harvest results and adjust recommendations; however, we can definitely expect the presence of moderate, if not quite high levels of mycotoxin risk this year.

Digital EuroTier 2021: Get to know EW Nutrition like never before

Visitors to EW Nutrition's innovative online booth at this year's EuroTier (9-12 February) will get exclusive access to our program and product presentations, delivered by our technical experts. Look forward to exploring our newly acquired Feed Quality and Pigment offers, as well as a live stream session on passive immunity in dairy calves.

The EW Nutrition team will share our expertise on how to support gut health, mitigate the impact of mycotoxins and [bacterial toxins](#), and reduce the incidence of diarrhea in young animals. We will also introduce visitors to our recently-acquired [new product ranges](#), including the [SANTOQUIN®](#) feed preservative range, the feed mill processing aid [SURF●ACE®](#), and the [feed ingredient Agrado® Plus](#). Our technical experts will be available for audio and video meetings, which can be scheduled via the [EuroTier 2021 online platform](#).

Not to be missed is EW Nutrition's "spotlight" event on cattle, presented by our technical manager for Farm Solutions, Lea Poppe. Lea will explore the topic of "Passive Immunity in Dairy Calves: Recent Insights and Innovative Solutions" during a public event for all EuroTier visitors. Join us at 9 am, CET, on February 10, for an in-depth presentation and lively discussion.

As the [2021 EuroTier](#) will take place fully online, visitors to the world's leading trade fair for animal production will be able to enjoy attractive digital networking opportunities. We look forward to meeting you there!

About EW Nutrition
