The value of biosecurity in animal production: in times of health & in times of disease

Partners in Progress – Connect is a science-based webinar series, which enables the exchange of experience, knowledge and innovative ideas.

Biosecurity is crucial for disease prevention in animal production systems. Understand the biosecurity principles to achieve and maintain a healthy production unit and learn how interventions that prevent the entrance and spread of disease have an additional pay-off. The webinar will take about 60 minutes and will offer a presentation on the topic, as well as a chance to ask questions and get honest, insightful, and actionable answers. The presenters for this webinar are:

Marisabel Caballero
Global Technical Management Poultry

Fellipe Freitas Barbosa
Team Lead Global Technical Management Swine
